language
skills grow

How does it work?

Let's build bridges through language! We take care of the entire process – from planning and tailoring the training to your organization, to delivering the course itself – using modern teaching methods and up-to-date materials.

- **Location:** At your workplace or another suitable location.
- **Schedule:** Planned according to your needs, e.g. 40, 80, or 120 lessons. For example, 8 lessons per week, 4 lessons on two days.
- **Format:** Individual or small groups (2–10 participants), sometimes larger groups in collaboration with multiple employers.
- **Content:** Everyday Swedish and professional vocabulary, work-related language, and themes such as work environment and rights.
- **Flexibility:** We tailor the setup to the participants' needs and preferences – together with you.

For whom?

Would you like to strengthen your language skills at work and feel more confident in your everyday life in Åland?

We offer flexible Swedish language training directly at the workplace, with a focus on communication, professional language, and that extra touch that build both well-being and resilience. The training is aimed for individuals who work in Åland, are insured through Kela or by their employer, and who need basic Swedish skills to manage everyday communication and work-related situations.

We have experience tailoring instruction for a variety of sectors – especially within social and healthcare services, where we have solid expertise and many years of experience.
